## Customized Rugged Motion System

**Multi-axes comprehensive motion system designed with the customer, that is highly maneuverable and easy to manage.**

It synergizes motors and drives that are developed and produced under the same roof at the Gevasol Group.

The system is optimized from the outset of the design process, including production and support-related considerations, by working closely with the customer in the development of both motors and drives.

As for post-sale support, the customer has one address for troubleshooting and servicing the entire motion system.

### Scope

The motion system includes motors and drives of 27 axes

#### Motors

**Gilboa:** 11

**Meiron:** 9

**Arbel:** 4

**Ramon:** 3

#### Drives

**Dolomite II:** 15

**Dolomite III:** 9

**Dolomite IV:** 3
